Welcome to USI Università della Svizzera italiana

USI is Switzerland's most international university. It is distinctive in the Swiss university system because of the originality of its degree curricula and areas of research. Its relatively contained size and numbers assure direct interaction between the members of the academic community. The result is a collegiate, dynamic, and multicultural atmosphere, a powerful magnet for motivated students and talented researchers.

Welcome to the Faculty of Economics

The Faculty of Economics of the USI Università della Svizzera italiana offers a degree curriculum designed to provide a sound background in the three core domains: Economics (political economy), Finance, and Management.

The Faculty is perfectly in line with the Swiss and European university systems and is particularly sensitive and attentive to the language component (courses in English and German for economists).

The Faculty of Communication Sciences

The Faculty of Communication Sciences is the only one in Switzerland and among the few in Europe to offer an all-round education in communication, with a fully interdisciplinary approach. The study curriculum covers the spectrum from the fundamentals of the discipline to cutting-edge specialization, with a view to turning out not simply communication generalists, but leading specialists in particular sectors of the field.

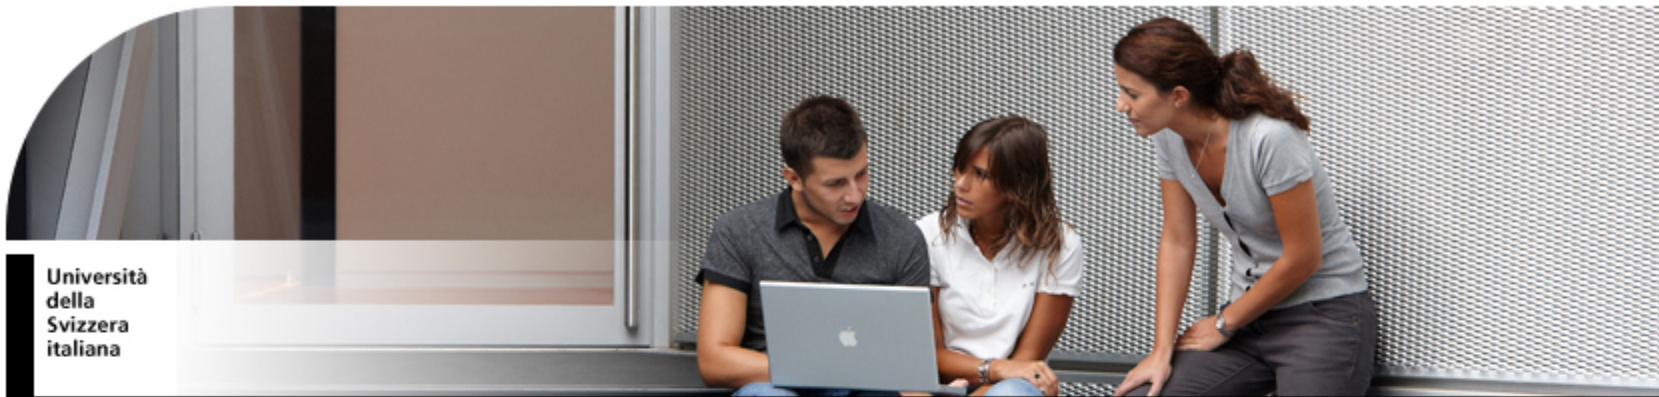

The Faculty aims to prepare communication experts operating in five major professional contexts: media, business, public institutions, education, and information technology. In accordance with the Bologna system, the study programme encompasses a Bachelor's degree (three years), Master's degrees (two years) and a research-oriented PhD programme in three years.

A remarkable array of research is conducted by the faculty through its institutes and research laboratories, in areas pertaining to linguistics, education, media, health communication, psychology, information technologies and corporate communication.

The Faculty of Informatics

Established in October 2004, USI's Faculty of Informatics is dedicated to high quality teaching and research. The mission of the Faculty is to conduct research and produce results in the field of informatics and to equip students with creative problem-solving skills that enable them to address complex problems in business and society.

Teaching excellence is assured by an international faculty, low student/academic staff ratio and a modern, innovative curriculum. The undergraduate programme is project-based and comprises six semesters of highly integrated courses and team-oriented projects. For graduate students, the Faculty offers several specialized Master's programmes and a research-oriented PhD programme. The PhD programme is highly selective and gives students the opportunity to participate in national and international research projects. The tuition language in the Faculty is English.

The Faculty of Informatics is active in research on software-intensive systems, with particular strengths in software engineering, distributed systems, and networks. The Faculty has an active network of research partnerships with

- Master in Italian Language, Literature and Civilization

Institute of Italian Studies (ISI)

Founded in March 2007, the Institute of Italian Studies (ISI) is directed by Carlo Ossola. Established in the only Italian-speaking university outside of Italy, ISI has the aim of strengthening the university's commitment to the Italian language, literature, and culture.

The study of the Italian language and literature develops through a constant dialogue with arts and history. The Institute has launched a Master (2-years specialist degree), a PhD and, in the academic year 2012-2013, a Bachelor programme in Italian Literature and Culture, inviting lecturers from Switzerland, Italy and wider Europe, who themselves embody, throughout their research path, the parable of a "language sweet and flavoursome, built with the sounds of solidarity" (O. Mandelštam, 1933).

ISI intends to promote Italian studies also by establishing relationships with the most active research institutions in Switzerland and abroad.

“...this is made possible by the **close teaching relationship** established with the faculty members. The dimensions of the Academy of Architecture and the USI’s faculties are carefully controlled so as **to prevent the kind of overcrowding** that today penalizes numerous schools. There are some 2700 students in Lugano and 700 in Mendrisio, which means that classes can be kept to a limited number of students. The architectural design studios also contain a maximum of **about 24 students, whose work is supervised by a professor, in every case an eminent architect, and at least two assistants.** In the different fields of teaching it thus applies a “familial” model in which the teachers’ role as tutors guarantees formative protocols of the highest standard.”
